PMS

Property Management System by BJP Technologies

User Guide

How to run your properties in PMS, from the first sign-in to rent, receipts and reports, plus a short guide for your renters.

Part 1 · Landlords and staff

Setting up, leases, invoices, payments, maintenance, your website, reports and your team.

Part 2 · Renters

Activating the account, viewing invoices, downloading receipts and reporting problems.

pms.bjptechnologies.co.tz

Version 1 · October 2026

CONTENTS

What's in this guide

Part 1 follows the order you'll use PMS in: set up your buildings once, add renters and leases, then bill and collect every month. Part 2 is written for your renters; you can share those pages with them.

PART 1 · LANDLORDS AND STAFF

1 Signing in and your dashboard
2 Finding your way around
3 Locations, properties and units
4 Adding renters
5 Leases
6 Invoices
7 Payments and receipts
8 Expenses
9 Maintenance requests
10 Your website
11 Reports
12 Your team and roles
13 Workspace settings and your plan

PART 2 · RENTERS

14 Activating your account
15 Signing in
16 Your dashboard and invoices
17 Reporting a problem
18 Your profile and password

YOUR WEB ADDRESSES

Staff sign-in	pms.bjptechnologies.co.tz/manage
Your website	pms.bjptechnologies.co.tz/*your-workspace*
Renter portal	pms.bjptechnologies.co.tz/*your-workspace*/portal

Your workspace name is the short name in your invitation email, for example *mshale-plaza*.

PART 1

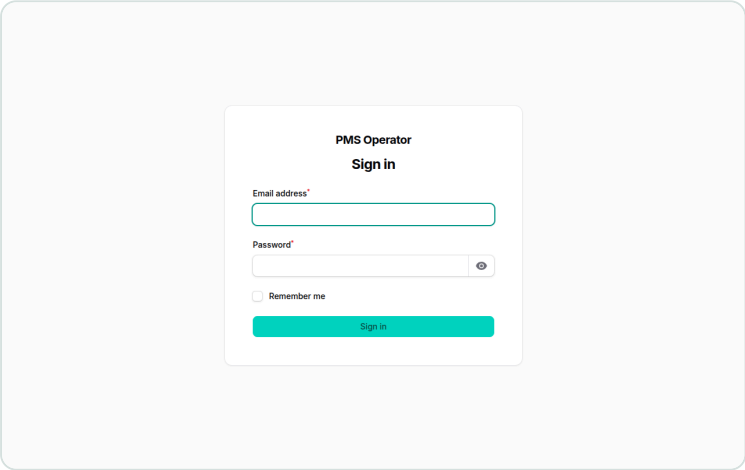

Landlords and staff

Everything here happens in the staff area at **pms.bjptechnologies.co.tz/manage**, on a computer or a phone.

1 Signing in and your dashboard

Your first sign-in

1. Open the email titled **"Activate your … staff account"** and press **Activate my account**. If a phone number was given, the same link also arrives by SMS.
2. Choose your password. The link works for **72 hours**. If it has expired, ask the workspace owner to resend it (section 12), or ask BJP if you are the owner.
3. From then on, sign in at **pms.bjptechnologies.co.tz/manage** with your email and password. Capital letters in the email don't matter.

The staff sign-in page.

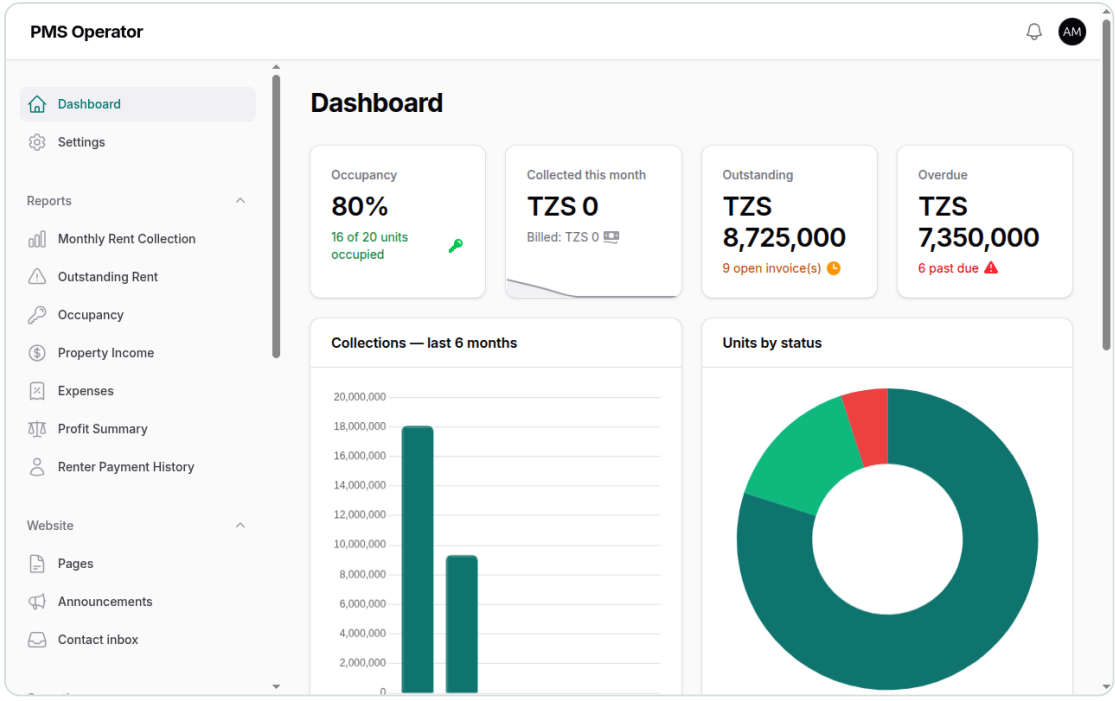

Forgot your password?
There is no reset link on the sign-in page. Ask the workspace owner to press **Resend invite** next to your name under Team; you'll get a new activation link and choose a new password.

The dashboard

The dashboard is the first page after signing in. The four figures at the top tell you where you stand this month:

Occupancy	The share of your units that have a renter.
Collected this month	Payments recorded this month, against what was billed.
Outstanding	Everything still owed on open invoices.
Overdue	The part of that which is past its due date.

Below them are your collections over six months, units by status, the five largest unpaid invoices and the latest payments. A short tour runs the first time you sign in; you can skip it.

The dashboard.

2 Finding your way around

The menu on the left is grouped by job. On a phone, open it with the menu button at the top.

MENU GROUP	WHAT'S IN IT
Dashboard, Settings	Your overview, and your workspace details and plan (section 13).
Inventory	Locations, Properties and Units: your buildings, set up once.
Leasing	Renters and Leases.
Billing	Invoices, Payments and Receipts.
Operations	Expenses and expense Categories.
Maintenance	Repair requests from renters and staff.
Website	Your public website's Pages, Announcements and Contact inbox.
Reports	Seven reports, each downloadable as Excel or PDF.
Administration	Team (your staff) and Roles & Permissions.

Every list works the same way: search at the top right, filters behind the funnel icon, and the action buttons (**Edit**, **Issue**, **Download PDF** and so on) at the end of each row. The bell at the top shows notifications, such as a new maintenance request.

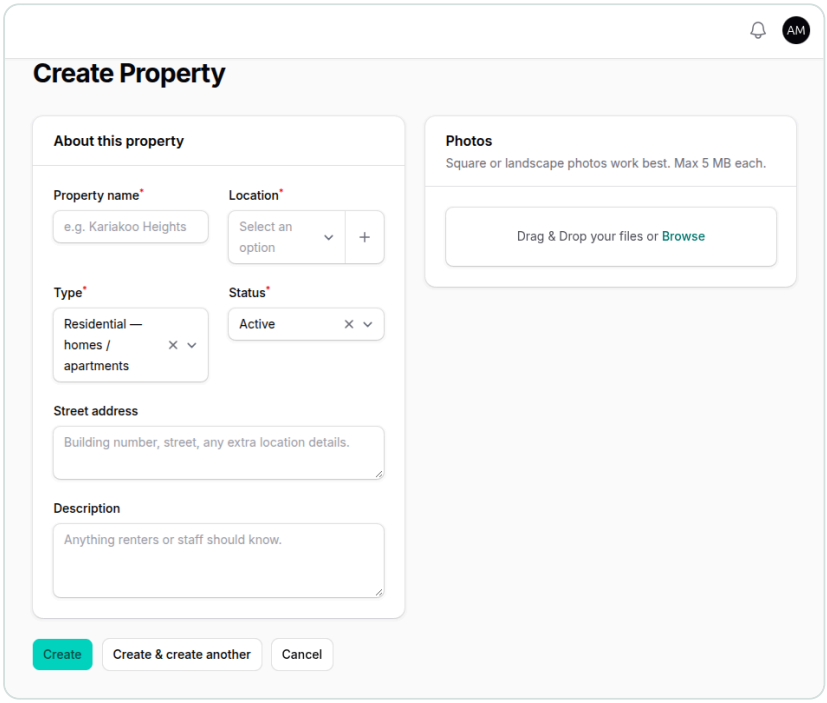

What you see depends on your role.
An accountant, for example, doesn't see Team. If something in this guide is missing for you, your role or your plan doesn't include it.

3 Locations, properties and units

Set this up once. A **location** is an area (region, district, ward), a **property** is a building or compound, and a **unit** is what you rent out: a room, apartment, business frame, office, shop or warehouse.

Add a property

1. Go to **Inventory** → **Properties** and press **New Property**.
2. Enter the **Property name** and choose its **Location**. If the location doesn't exist yet, press **+** beside the field to add it there.
3. Choose the **Type** and **Status**, and add the street address and a description if you wish.
4. Add photos (up to 5 MB each); they appear on your website. Press **Create**.

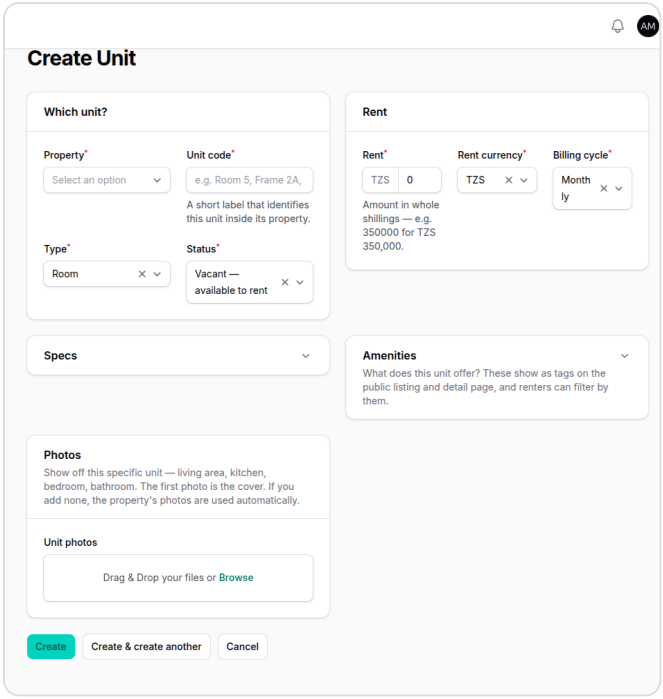

Adding a property.

Add units

1. Go to **Inventory** → **Units** and press **New Unit**.
2. Choose the **Property** and give the unit a short **Unit code**, such as "Room 5" or "Frame 2A".
3. Choose the **Type**. Leave **Status** as *Vacant* unless someone already lives there.
4. Under **Rent**, enter the amount in whole shillings (350000 for TZS 350,000), the currency and the billing cycle.

5 Optionally fill in **Specs** (bedrooms, bathrooms, size), tick **Amenities** and add photos. Press **Create**, or **Create & create another** to add the next unit straight away.

Adding a unit. Vacant units appear on your website automatically.

Plan limits

Each plan allows a number of properties, units and staff, and the Properties, Units and Team pages show how many you've used, for example "45 of 60 units used on the Starter plan". When you reach the limit, the **New** button is replaced by **Request an upgrade**, which tells BJP you need a bigger plan. Everything you already have keeps working.

4 Adding renters

1 Go to **Leasing** → **Renters** and press **New Renter**.

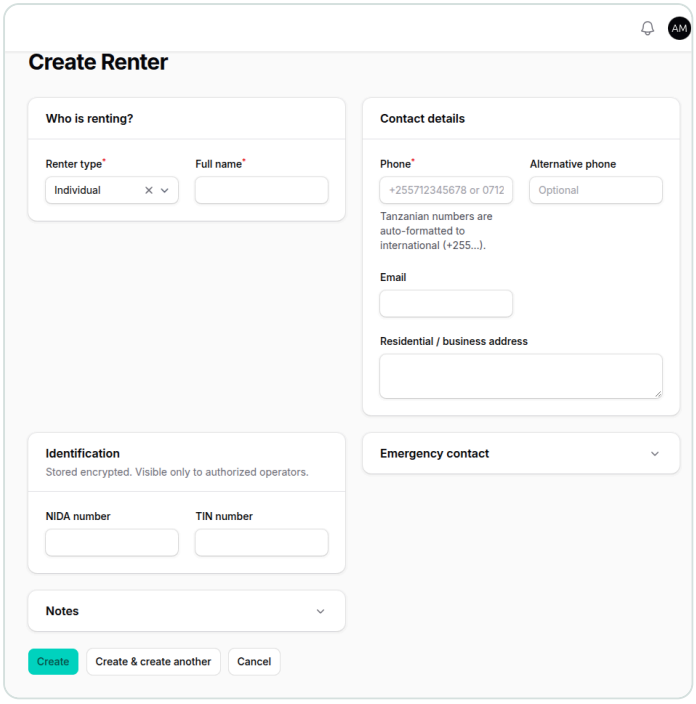

2 Under **Who is renting?** choose an individual or a business and enter the **Full name**.

3 Enter the **Phone** number. You can type it as 0712 345 678; PMS stores it in the international format. Add an email address if they have one.

4 Add identification (NIDA or TIN number), an emergency contact and notes if you need them. Press **Create**.

Phone and email matter.

The phone number is how the renter signs in to the renter portal. The email address is where their invoices, receipts and reminders are sent. Without an email, the renter still sees everything in the portal.

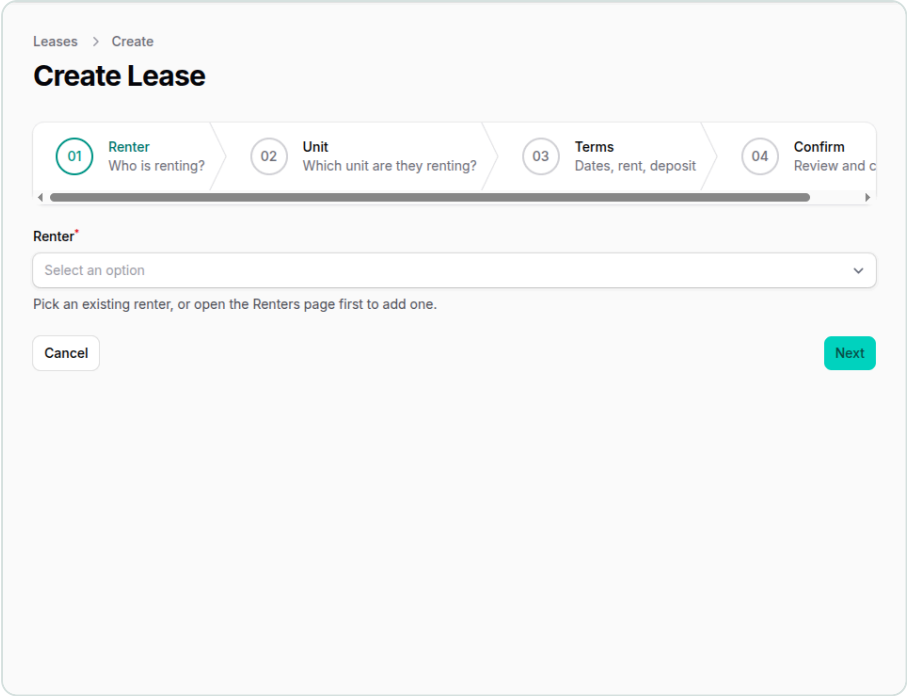

Adding a renter.

5 Leases

A lease connects a renter to a unit, with the rent, dates and deposit. Creating one takes four steps.

1. Go to **Leasing** → **Leases** and press **New Lease**.
2. **Renter:** choose who is renting.
3. **Unit:** choose which unit they're renting.
4. **Terms:** enter the start and end dates, rent, deposit, billing cycle and the day of the month rent is due.
5. **Confirm:** check the summary and create the lease. It starts as *Pending*.

The four steps of a new lease.

Activating a lease

When the renter moves in, press **Activate** on the lease. Three things happen:

- The lease becomes **Active** and the unit is marked **Occupied**.
- If your plan includes the renter portal, the renter gets an account and an activation link by email (and SMS where set up).
- The change is recorded in the lease's **History**.

Other lease actions

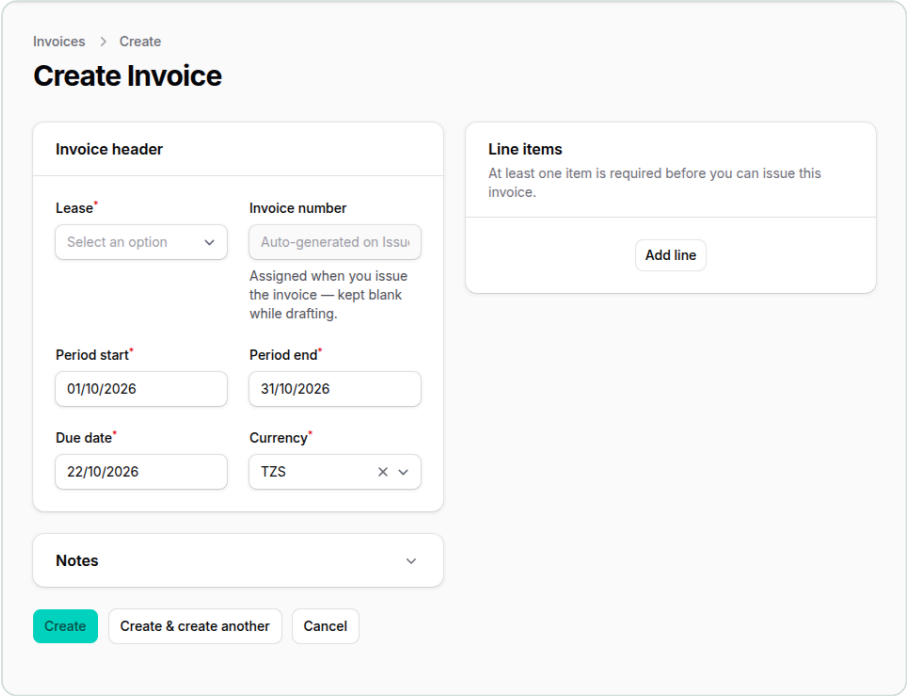

Download PDF	A printable lease contract to sign.
End (natural)	The lease ran its course. The unit becomes vacant again.
Terminate	Ending early. You're asked for a reason, which is kept in the history.
History	Every change to the lease, who made it and when.

6 Invoices

Create an invoice for each rent period.
PMS doesn't create rent invoices on its own yet. At the start of each period, create the invoice for each lease as described below. Overdue tracking is automatic.

1. Go to **Billing** → **Invoices** and press **New Invoice**.
2. Under **Invoice header**, choose the lease, the **Period start** and **Period end**, and the **Due date**. Leave the invoice number empty; it's given when you issue.

3. Under **Line items**, press **Add line** for each charge. A line can be rent, a utility, a fee, a deposit or anything else.
4. Press **Create**. The invoice is saved as a **Draft**, which the renter can't see yet, so you can still correct it.
5. When it's right, press **Issue** on the invoice. It gets its number, and the renter is emailed and sees it in the portal.

A new invoice with its line items.

What the statuses mean

Draft	Not sent yet; only you can see it.
Unpaid	Issued, nothing paid.
Partial	Part of it is paid.
Paid	Fully paid.
Overdue	Past its due date and not fully paid. PMS checks every morning at 06:00 and emails the renter a reminder.
Cancelled	Cancelled with **Cancel**; kept for your records.

Every invoice can be downloaded with **Download PDF**.

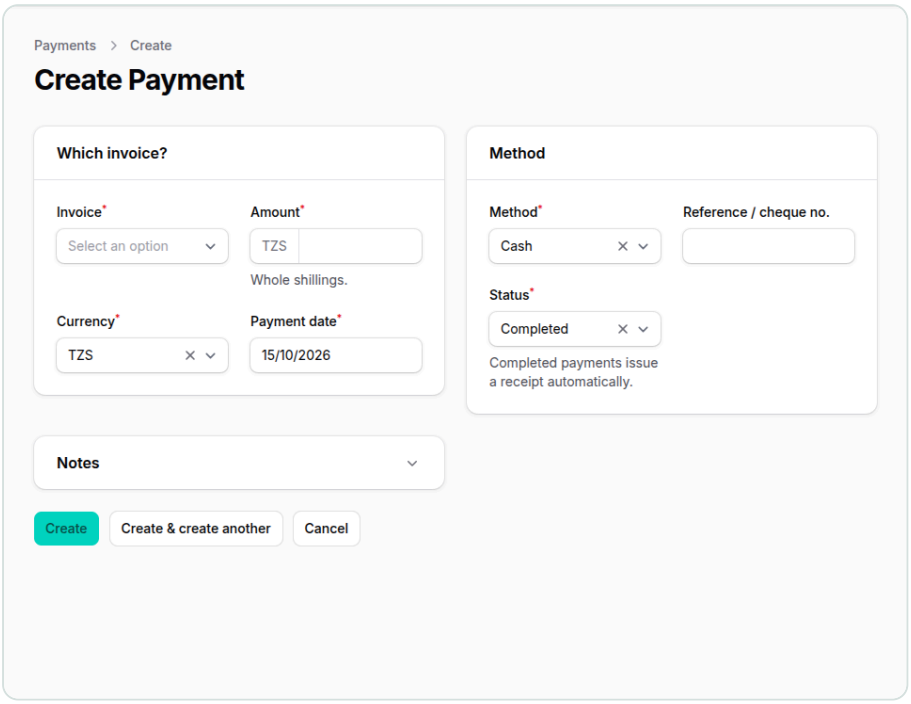

7 Payments and receipts

Renters pay you the way they always have: cash, bank, mobile money. You record the payment in PMS, and the receipt is produced for you.

1. Go to **Billing** → **Payments** and press **New Payment**.

2. Under **Which invoice?** choose the invoice being paid.
3. Enter the **Amount** and **Payment date**. A part payment is fine; the invoice becomes *Partial*.
4. Choose the **Method**: cash, bank transfer, mobile money, cheque or card. Add the transaction or cheque number under **Reference**.
5. Leave the status as **Completed** and press **Create**.

PMS then updates the invoice balance, creates a numbered **receipt**, and emails it to the renter as a PDF. You'll find every receipt under **Billing** → **Receipts**, where you can download or email it again.

Recording a payment.

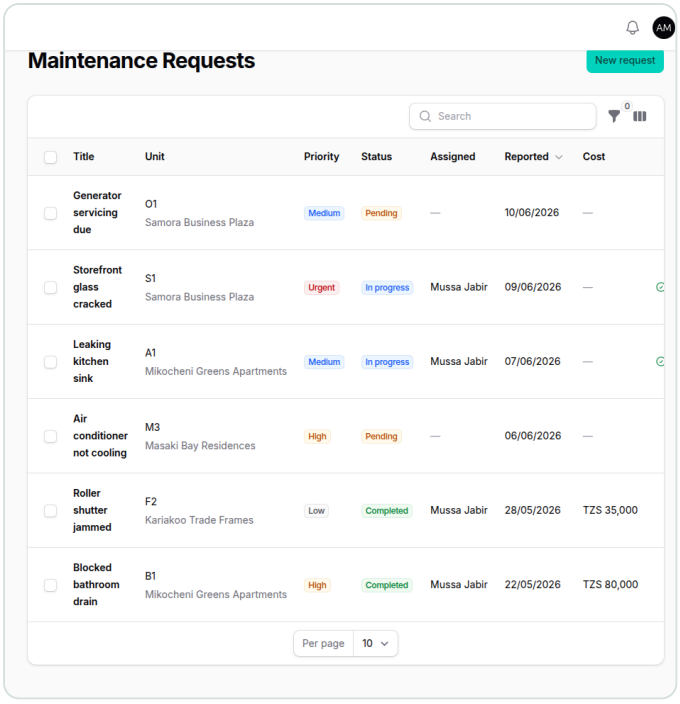

8 Expenses

Record what your buildings cost, such as repairs, security, cleaning and utilities, so your reports show real profit. Go to **Operations** → **Expenses**, press **New Expense**, and choose a category, the property, the amount and the date. You can attach a photo of the paper receipt. Manage your list of categories under **Operations** → **Categories**.

9 Maintenance requests

Renters report problems from the renter portal, with photos if they like. Staff can also log a request with **New Maintenance Request**.

- A new request notifies the owner, managers and maintenance staff by email and in the bell.
- Press **Start** when work begins and **Complete** when it's done, or **Cancel** it. The renter sees each change in the portal.
- Open a request to add progress notes, which keep a running record of what was done.

Maintenance requests, with Start, Complete and Cancel on each row.

10 Your website

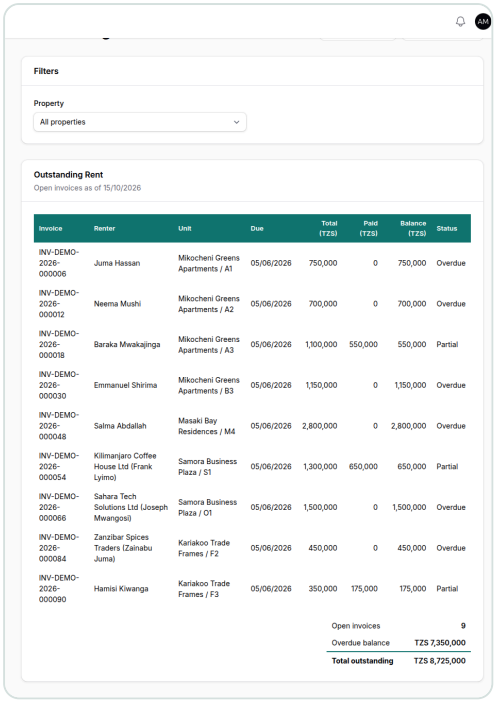

Your workspace comes with a public website at **pms.bjptechnologies.co.tz/*your-workspace***, with Home, About, Units, News and Contact pages.

- **Website → Pages:** edit the text of each page.
- **Website → Announcements:** post news, such as a water cut or new units.
- **Website → Contact inbox:** messages visitors send through the contact form. You're also notified by email.
- The **Units** page lists your vacant units with their photos, rent and amenities automatically. Once a unit is occupied it drops off.

11 Reports

Seven reports under **Reports** in the menu. Choose the filters, such as the property or the dates, then press **Download Excel** or **Download PDF**. Reports are included from the Starter plan up.

Monthly Rent Collection	What was billed and collected each month.
Outstanding Rent	Who owes what, and how late it is.
Occupancy	Occupied and vacant units per property.
Property Income	Income per property.
Expenses	Spending by category.
Profit Summary	Income minus expenses.
Renter Payment History	Every payment one renter has made.

The Outstanding Rent report.

12 Your team and roles

1. Go to **Administration** → **Team** and press **Invite member**.
2. Enter their name and email and choose a role. They receive an activation email, as you did.
3. If the email doesn't arrive or the link expires, press **Resend invite** next to their name. The new link is also shown to you, so you can send it by WhatsApp.

ROLE	TYPICAL USE
Owner	Everything, including the team and settings.
Manager	Day-to-day running: renters, leases, billing, maintenance.
Accountant	Invoices, payments, expenses and reports.
Maintenance staff	Maintenance requests.

On the Pro plan and above, the owner can change exactly what each role may do under **Administration** → **Roles & Permissions**.

13 Workspace settings and your plan

Settings (owners only) has five tabs: **Business** (name, email, phone), **Branding** (logo and colour, used on your website and renter portal), **Preferences**, **Security** (change your password) and **Subscription** (your plan and when it renews).

PART 2 · FOR RENTERS

Your renter portal

Your landlord uses PMS to manage your tenancy. The renter portal lets you see your rent, download receipts and report problems from your phone. Nothing to install: it opens in your browser.

14 Activating your account

1. When your lease starts, you receive an email (and an SMS where available) with an activation link.
2. Open it and choose your password. The link works for 72 hours. If it has expired, ask your landlord to send a new one.

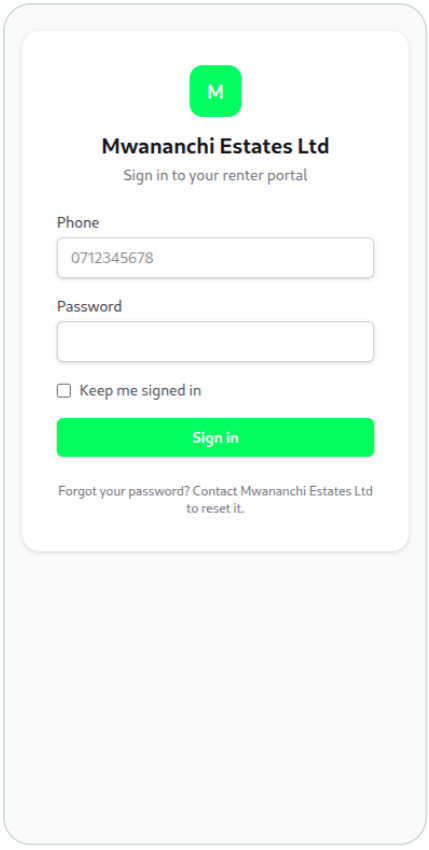

15 Signing in

Go to the portal address your landlord gives you, for example **pms.bjptechnologies.co.tz/*mshale-plaza*/portal**. Sign in with your **phone number** (such as 0712345678) and your password.

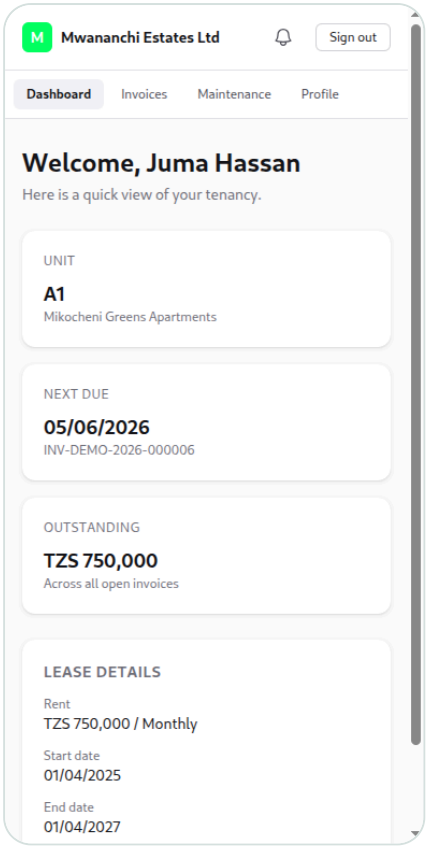

Forgot your password?
Contact your landlord. They'll send you a new activation link so you can choose a new one.

16 Your dashboard and invoices

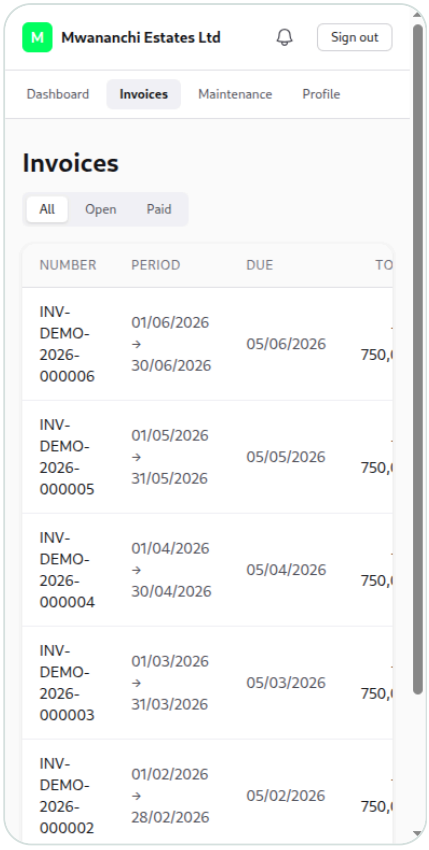

The **Dashboard** shows your unit, your next due date, what you owe in total, and your lease details. Under **Invoices** you'll see every invoice; filter by *Open* or *Paid*, and download the receipt for any payment.

Signing in

Your dashboard

Invoices and receipts

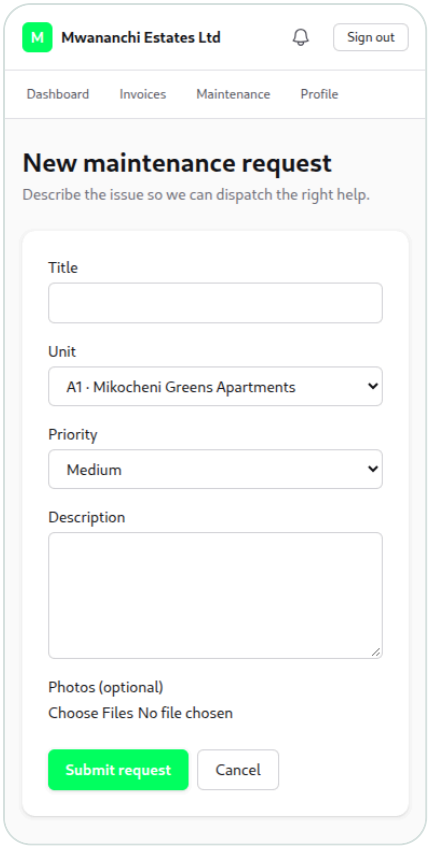

Pay your rent the way your landlord asks: cash, bank or mobile money. Once they record it, your receipt arrives by email and appears here.

17 Reporting a problem

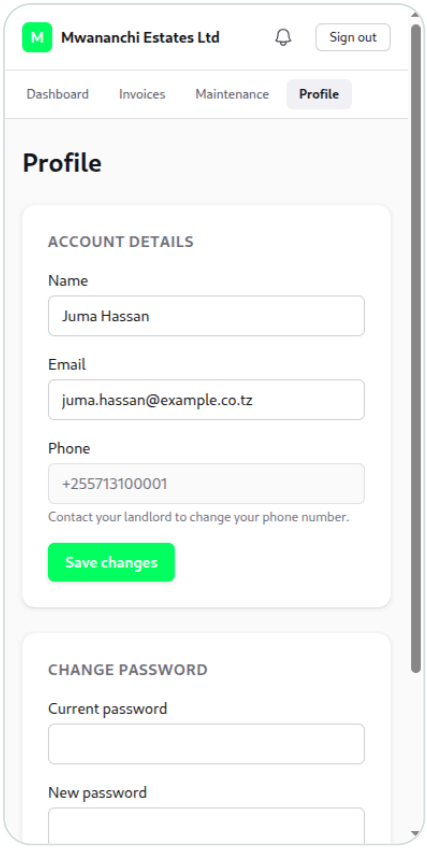

1. Open **Maintenance** and start a new request.
2. Give it a short title, choose your unit and how urgent it is, and describe the problem. Add photos if they help.
3. Press **Submit request**. Your landlord is notified straight away, and you can follow progress under **Maintenance**.

18 Your profile and password

Under **Profile** you can update your details and change your password.

Reporting a problem

Your profile

Need help with PMS?

Landlords and staff can contact BJP Technologies. Renters, please contact your landlord first.
