

SALES BROCHURE · 2026

Manage every rental from *one place.*

Property management software, built for Tanzanian landlords
properties, tenants, rent, receipts and reports, all in one.

02 — THE PROBLEM

Running rentals *the hard way*.

Most landlords still manage millions of shillings with a pen, a notebook, and a great many phone calls. It works — until it doesn't.

01

The notebook

Rent tracked in exercise books, Excel and WhatsApp chats that no one can properly audit or trust.

02

The chase

Calling tenants one by one at month-end, never quite sure who has actually paid and who hasn't.

03

The empty room

Vacant units sit idle for weeks because no one outside knows they are even available.

04

The blur

Income and expenses scattered everywhere, so the real profit of each property is only ever a guess.

03 — WHAT IT DOES

Everything you need, *in one place.*

Properties & units

Every building and unit on one dashboard, with live occupancy at a glance.

Rent & receipts

Record cash, bank or mobile-money payments; numbered receipts produced instantly.

Tenant portal

Tenants check their bills and payment history themselves — far fewer calls to you.

Tenants & leases

Full tenant records and professional lease contracts generated as PDFs.

Reports

Collection, occupancy and profit per property — exported to PDF or Excel.

Your own website

A branded public page that advertises your vacant units automatically.

REAL LISTINGS FROM A LIVE PMS WEBSITE

— BEJUNDAS PROPERTIES

04 — BUILT FOR TANZANIA

Made for the way *Tanzania* rents.

Not a foreign tool bent to fit. PMS speaks the language, the currency and the payment methods landlords here already use.

- | | |
|--|---|
| ✓ Full Swahili & English — switch anytime | ✓ Prices in TZS; records M-Pesa, Tigo Pesa & Airtel Money |
| ✓ Homes, business frames, shops & warehouses | ✓ Local support from BJP Technologies |
